THE POWER OF DIGITAL FUTURE

For more than 20 years, Omega Software d.o.o. has been the leader of Croatian IT, with an emphasis on quality and technology, with the aim of creating the most effective business solutions based on its own innovative platforms.

We use the advantages of new technologies, long-term know-how, and best practices to digitally transform everyday operations.

We bring positive changes and added value to our clients' work.

WE CREATE SOLUTIONS FOR:

LOCAL SELF-GOVERNMENT	PUBLIC ADMINISTRATION
PUBLIC UNDERTAKINGS	SERVICE SECTOR
PRIVATE SECTOR	ENERGETICS

20+ ✓
years of development

500 ✓
satisfied clients

200 ✓
professional associates

500 ✓
successful projects

WHY CHOOSE OMEGA SOFTWARE?

1. ACCOUNTABILITY

A team atmosphere with emphasis placed on independent professional work and prioritization of tasks for an overall better result.

2. FOCUS ON CLIENTS

A long-term solution, not just a temporary measure for a current problem.

3. PROACTIVITY

Continuous improvement through analyticity, knowledge exchange, and innovation.

We improve business processes

OUR SOLUTIONS

Centrix

Electronic Office Business System (EOBS)

It supports and enables the complete digitization and digital transformation of the office business process following the new Regulation on office business and the corresponding standard technical specification of the office business information system.

The solution complies with ISO 15489 and ISO 30301 standards.

Pismohrana

Information system for managing digital and conventional documentary and archival material in accordance with legal regulations and the RiC standard.

The solution complies with ISO 15489 and ISO 30301 standards.

BGA

A comprehensive information solution developed to support various aspects of accounting within national authorities.

The purpose of the system is to enable public authorities to manage their budgets efficiently and transparently, with support in all accounting functions.

IoT Complete

The IoT Complete platform and solutions serve to collect, process, visualize, monitor, and automatically manage data with the help of IoT devices. By using the specialized applications Eco Luna and MyUtility, users can monitor the collected data, conduct analyses, and create reports to optimize the operation of their systems with the aim of responsible energy management and cost reduction.

CUSTOM-MADE SOLUTIONS

Solutions according to specific user requirements and all the peculiarities of the business processes they support.

eFondovi

Information system intended for recording, storing, and data processing, necessary for financial monitoring and monitoring of project implementation.

✅ More than 20.000 users, 13.000 registrations, and over 8 billion Euros of acquired funds.

eVisitor

The information system for tourists' registration and checking out is a unique system that functionally connects all tourist boards in the Republic of Croatia.

✅ Over 150 million arrivals and 700 million overnight stays were recorded over 10 years.

eKohezija

The eKohezija system is a component of the EU funds electronic system for managing cohesion envelope funds.

eRedar

It enables the management of reports of municipal and traffic irregularities and the coordination of all involved parties through mobile applications and web solutions.

MojZagreb

It provides citizens of the City of Zagreb with a centralized location access to all City Administration e-services through web solutions and the MojZagreb mobile application.

eVrtići

eVrtići are a business system that consists of several connected subsystems that are aligned with the normative framework - for Children's Records, Subject Management, Online Enrollment, etc.

RedGO

A digital platform that enables a simple and transparent access to permit-and-solution documents related to waste management, and conducting the administrative procedure of issuing permits and solutions for waste management, digitally.

Portal otvorenih podataka

Portal otvorenih podataka (open data portal) enables the collection, categorization, and distribution of public sector open data, and on it, there are datasets published by publishers from public sector authorities.

Eco Luna

Eco Luna is a specialized application that enables monitoring and management of the public lighting sector. The application enables the recording and reviewing of lighting fixtures, monitoring of current and historical energy parameters, analysis of collected data, and lighting management.

MyUtility

MyUtility is a specialized application that answers the question of where and how energy and water are consumed. It is possible to monitor consumption, compare collected data, and create various reports that facilitate planning and optimization of future consumption. By using IoT technologies, it is possible to achieve the set goals of reducing consumption, costs, and CO_2 emissions and compliance with ESG goals.

MojRačun

The mobile and web application of Gradska plinara Zagreb – Opskrba (City Gasworks Zagreb - Supply) that simplifies users' use of GPZO services. It achieved direct savings and ensured the regular settlement of the obligations of the users of the gas supply service according to GPZO.

ePisarnica

It enables the citizens of the City of Zagreb to check the stage of processing the submitted request (ePredmet), check the validity of the content of the electronic document (check eIsprava), apply for retrieval of issued electronic documents, and submit available electronic requests (eIsprava), etc.
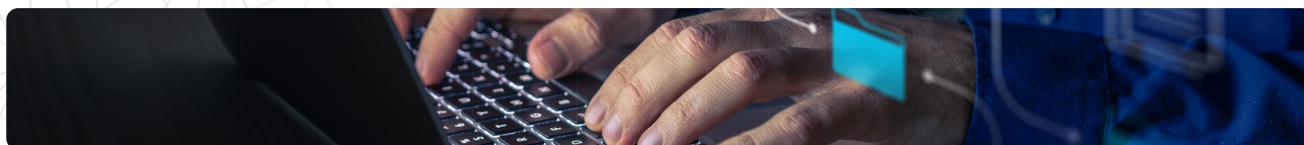

GOCE

Gradski operativni centar (City Operations Center) is an information system designed for better city management and enables data exchange and communication between city bodies and organizations that deal with communal, police, and infrastructure management of the City

On-Line Prijavnice

On-line Prijavnice (Application Forms) are used to apply for financing needs in culture, to which all legal and natural persons can apply. After filling in the data in the web application, it is possible to print the application form (online application form).

eDoprinosi

Subsystem for the calculation of communal contributions, legalization fees, collection monitoring, and warning generation.
